-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent 2000356297 in view of Inaba et al. (US Patent 5,246,643).

Japanese Patent 2000356297 discloses an injection molding machine having a centralized lubrication device comprised of a greasing pump 1 and a greasing pipe 4, a pressure sensor 5 for detecting a pressure of the lubricant and a display control means shown in Figs. 6 and 7 displaying the pressure data.

However, 2000356297 does not disclose a storing means a storage means for storing the pressure detected by said sensor. Inaba et al. disclose a RAM 4 for use as a monitor data storage to be conventional.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a RAM in the apparatus of 2000356297 in order to store the displayed data of the monitor as suggested by Inaba et al.

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 3-5 are allowed. Claims 2-5 define over the prior art since the prior art fails to disclose or suggest the parts to be lubricated or the comparison means and informing means as set forth in the claims.
